YouTube Upload Kit: Sales MIS Report in Excel

For `output/mis_tutorial_no_voice.mp4` · 1920×1080 · 30 fps · 10:54 · no voiceover, no burned-in subtitles · music + sound effects

1. Files to upload

What	File	Where in YouTube Studio
Video	`output/mis_tutorial_no_voice.mp4`	Upload
Thumbnails (3)	`output/thumbnails/thumbnail_A/B/C_*.jpg`	Details → Thumbnail → **Test & compare** (upload all three)
English subtitles	`subtitles/youtube_english.srt`	Subtitles → Add language: **English** → Upload file → With timing
Hinglish subtitles	`subtitles/youtube_hinglish.srt`	Subtitles → Add language: **Hindi (Latin)** if listed, otherwise **Hindi** → Upload file → With timing

2. Title

MIS Report in Excel | Sales Dashboard Step by Step (Pivot + Slicer)

67 characters. The main search phrase "MIS Report in Excel" comes first, so it survives truncation in search results.

Alternatives (rotate later, or keep for the next video in the series):

- How to Make MIS Report in Excel | Sales Dashboard from Raw Data (63 chars)
- Excel MIS Report for Beginners | SUMIFS, COUNTIFS, Pivot Table & Slicers (72 chars)
- Sales Dashboard in Excel | MIS Executive Skills | Raw Data to Report (68 chars)
- MIS Report in Excel: Pivot Table + Slicer Dashboard (Step by Step) (66 chars)

3. Tags

```
mis report in excel, sales mis report, mis report, mis report kaise banaye, excel dashboard, sales dashboard in excel, excel mis report, mis report format in excel, mis executive, excel sales report, pivot table in excel, slicer in excel, sumifs formula in excel, countifs in excel, excel table, structured references excel, pivot chart, kpi dashboard excel, excel for beginners, advanced excel, excel tutorial, excel 365, data analysis in excel
```

445 / 500 characters. Paste as-is into the Tags box. YouTube splits on commas.

4. Hashtags

```
#MISReport #ExcelDashboard #ExcelTutorial
```

Already at the end of the description. YouTube shows the first three above the title.

5. Description (copy everything in the box)

```
Learn how to build a complete Sales MIS Report in Excel, step by step: from 180 rows of raw
sales data to a clean, interactive MIS dashboard with KPIs, Pivot Tables, Pivot Charts and
Slicers.
Turn on CC for English or Hinglish subtitles. (Hinglish subtitles available: CC on karein.)

In this tutorial:
✔ Convert raw data into an Excel Table (Ctrl + T) and name it SalesData
✔ Sales Amount with a structured reference: =[@Qty]*[@[Unit Price]]
✔ KPI cards with SUMIFS, COUNTIFS and IFERROR: Total Sales, Total Orders, Units Sold, Average
Sales per Order, Pending Sales Amount
✔ Region-wise and product-wise summary with % of total
✔ Pivot Tables and Pivot Charts (clustered column + pie)
✔ Slicers with Report Connections: one click filters every pivot and chart
✔ Dashboard formatting, Refresh All (Ctrl + Alt + F5) and a 3-way validation of the totals

Chapters
0:00 Introduction
0:46 Understanding the raw data
1:55 Convert data to an Excel Table (Ctrl + T)
2:42 Sales Amount with structured references
3:36 KPI cards: SUMIFS, COUNTIFS, IFERROR
5:17 Region-wise & product-wise analysis
6:19 Create a Pivot Table
7:24 Pivot Charts (column + pie)
8:02 Slicers & Report Connections
8:50 Dashboard formatting
9:24 Refresh & validate the report
10:08 Summary

Formulas used
• Sales Amount: =[@Qty]*[@[Unit Price]]
• Total Sales: SUMIFS on SalesData[Sales Amount] with an October 2026 date range built using
DATE()
• Total Orders: COUNTIFS on non-blank SalesData[Invoice No] in the same date range
• Average Sales per Order: =IFERROR(B6/D6,0)
• Pending Sales Amount: SUMIFS with Payment Status = "Pending"

Useful for MIS executives, accounts and sales teams, Excel beginners and office job interview
preparation.

Note: this video is an animated walkthrough of Microsoft Excel 365 with background music and
sound effects (no voiceover). The sample data is fictional.

#MISReport #ExcelDashboard #ExcelTutorial
```

1906 / 5000 characters. Chapters start at 0:00 and each is longer than 10 s, so YouTube will create them automatically. YouTube rejects "<" and ">" in descriptions, so the SUMIFS date range is written in words.

6. Upload settings

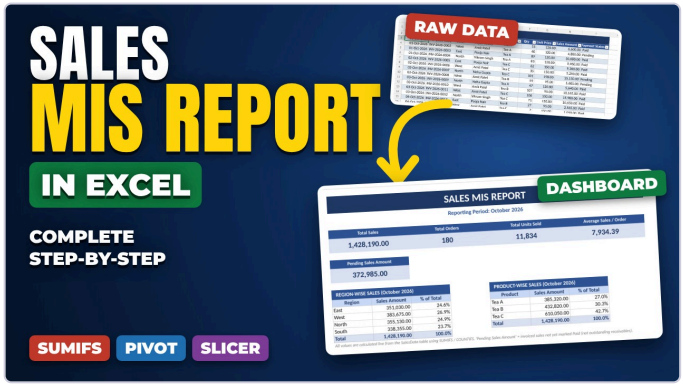

Setting	Value
Audience	No, it's not made for kids
Category	Education
Video language	English (the on-screen text is English; there is no speech)
Caption certification	None

Altered or synthetic content	Likely "No": it is an animated software walkthrough with no voice and no realistic people or events. The description also says it is an animated walkthrough.
Pinned comment	Which part should I explain in more detail next: monthly MIS automation, a Power Query version, or an XLOOKUP dashboard? Comment below 👇
End screen	Subscribe element + "Best for viewer" video, last 20 s (the closing card runs about 6 s, so the end screen overlaps the summary too)

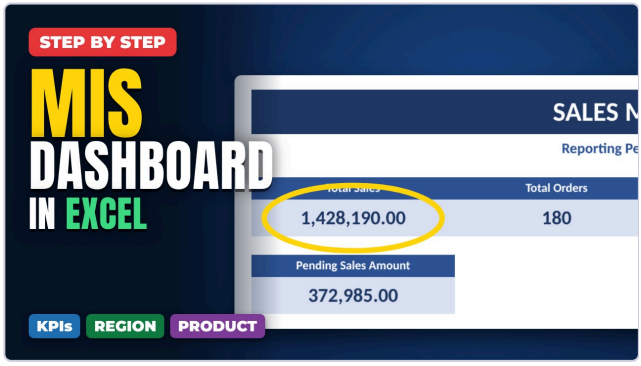

7. How good is this SEO? (please read)

> The title, tags and description follow standard YouTube SEO practice: the exact search phrase first, matching chapter titles, and related phrases people use for this topic ("sales dashboard in excel", "pivot table", "slicer", "mis report kaise banaye"). **They are not checked against live search-volume data.** vidIQ keyword research needs 5 credits and the account has 4 until 31 Oct 2026, and YouTube's search-suggestion service is blocked from this build machine. Before publishing, type "mis report in excel" into the YouTube search box: if a different phrasing shows up first in the suggestions, swap it into the title. No title can guarantee ranking; click-through rate and watch time decide most of it, which is why the Test & compare thumbnails matter.

8. Thumbnails

A · Raw data → dashboard (recommended first)
`output/thumbnails/thumbnail_A_raw_to_dashboard.jpg`

B · KPI dashboard, Total Sales circled
`output/thumbnails/thumbnail_B_kpi_dashboard.jpg`

C · Pivot + Slicer, one-click filter
`output/thumbnails/thumbnail_C_pivot_slicer.jpg`

1280×720 JPG, each under 2 MB (YouTube's limit). Fonts: Anton and Montserrat (SIL Open Font License, included in `assets/fonts/`). The screenshots inside are rendered from the same workbook as the video.
