CHERNOBYL HOOK · REVIEW & FIX REPORT

Aapka export.mp4 (0:00–0:45.5) script ke hisaab se check kiya aur theek kiya. 27 October 2026 · Final: HOOK_FINAL_WITH_VOICE.mp4 (54.9 s)

SHORT MEIN

• Aapke shots ka order script jaisa hi hai, aur saare shots achhe hain. Sirf unki timing aur finishing theek ki hai. Scene 01 mein ab aapki nayi ChatGPT image se bana clip hai: sadak par slow forward dolly (parallax ke saath), fog drift aur pattiyon ki halki hilchal.
• Export mein audio bilkul nahi tha (−91 dB, yaani khaali). Ab poora audio hai: 8 lines ki voice, music, hawa aur har scene ke SFX.
• Script ki 140–150 wpm speed aur "..." ke aadhe second ke pause ke saath lines bolne par hook 54.9 s ka banta hai, 46 s ka nahi. Notes kehte hain "voice ko tez mat karo, clip ko voice ke hisaab se khisko", isliye shots khiske hain. Part 1 ab 0:54.92 par shuru hoga (+8.9 s).
• Jo cheezein add ki gayi: shuru mein black se 0.5 s fade-in, CHERNOBYL title card aur Geiger click, dhamake par flash aur shake, poore video mein ek jaisa halka thanda grade, halka vignette aur grain.
• Export ab script ke hisaab se hai: 1920×1080, 25 fps, H.264 14 Mbps, AAC 320 kbps / 48 kHz, loudness -14.0 LUFS, voice peak -3.5 dB.

SCRIPT KE RULES VS AAPKA EXPORT

Rule (script / Notes)	Export mein	Ab
Scene 01: video black se, 0.5 s fade-in	Nahi tha	Add kiya
Voice 140–150 wpm, "..." par aadha second pause	Audio nahi tha	10 lines, 144–157 wpm; "..." 0.48–0.50 s
Voice peak −6 se −3 dB	—	-3.5 dB
Music 10–14% voice ke neeche, ducking 3–4 dB, pause mein 20–25% tak	—	Drone 10% voice ke neeche, gaps mein 14.5% (+3.2 dB), 2 s pause mein 20%, title hit par khatam

AAPKE DECISION KE LIYE

• Hook length. 54.9 s, jabki script mein 46 s tha. Agar theek 0:46 chahiye to do raaste hain: (a) lines chhoti karo, main chhote versions likh sakta hoon; ya (b) voice ko lagbhag 170 wpm par karo, jo aapke Notes ke khilaaf hai. Abhi wala version Notes ke hisaab se hai.
• Scenes 03–09 ke SFX. PDF mein in scenes ke cards band (collapsed) the, isliye SFX maine Notes ke volume rules ke hisaab se chune hain. Inme parda, metal creak, Geiger, rumble, dhamaka, bus engine, hawa ka jhonka aur title hit hain. Aapke cards mein kuch aur likha ho to bhej do, badal dunga.
• Scene 02 ka page flutter (0:08). Card kehta hai "jab video mein panna hilta hai", lekin aapke classroom clip mein panna nahi hilta. Awaaz halki (20%) rakhi hai, hawa mein kaagaz ki sarsarahat jaisi. Chaho to panna hilne wala clip dobara banao, ya ye SFX hata do.
• Dosimeter shot sirf 2 s ka hai. Isliye park ka shot "Kyunki is hawa mein kuch aisa hai..." ke neeche chalta hai, aur "..." par dosimeter par cut hota hai. Agar dosimeter 0:21.6 se chahiye to 5–6 s ka dosimeter clip bana lo.
• Scene 03 aur 04 ki speed 66–67% hai. Ye Notes ke 70–80% se thodi kam aur 50% ki limit se upar hai, frame blending ke saath. Sabse achhi quality ke liye ghar wala clip 6 s ka aur park wala 9 s ka generate karo.
• AI voice. Ye synthetic awaaz hai. Apni awaaz lagani ho to HOOK_FINAL_video_only.mp4 aur HOOK_mix_NO_VOICE.wav editor mein rakho, aur upar ki voice table ke times par bolo.
• Sunna zaroori hai. Maine sab kuch measurement aur spectrogram se check kiya hai, kyunki main sun nahi sakta. Notes ke mutabik ek baar headphone par aur ek baar phone speaker par suno, khaas kar 0:32.5 ka dhamaka.
• YouTube. Upload par "Altered or synthetic content" = Yes chunna (Notes, point 8).
